

affordable housing for kids!

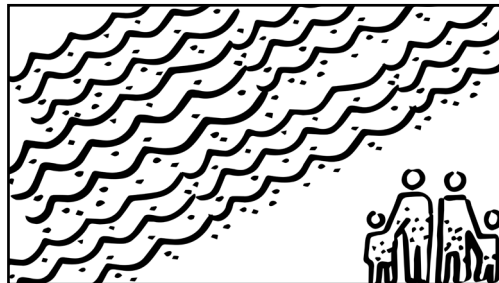

A home makes all the difference for families trying to make a better life for themselves.

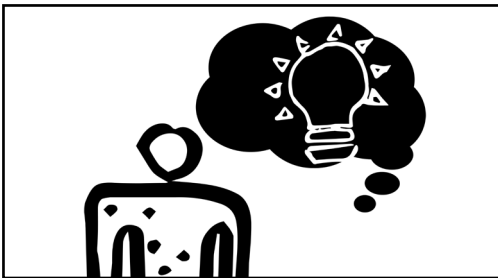

When families can afford a home, along with food and other necessities, they can plan for a bright future.

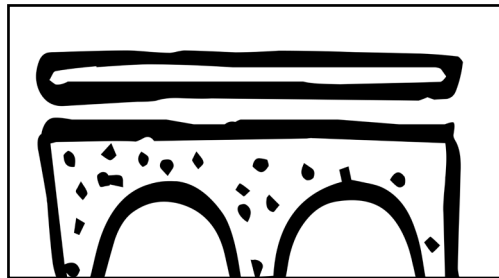

Having a safe, affordable home can feel like a far away dream for many families.

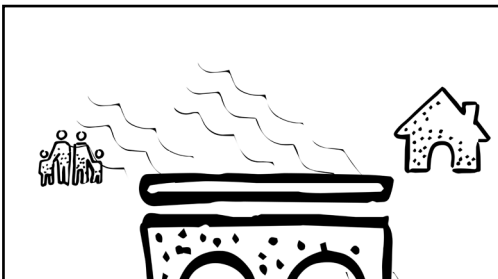

Nutritious food and other bills are really expensive! This makes it almost impossible for many families to save for a home purchase.

But what if it didn't have to be that way?

Volunteers, city leaders, businesses and families come together at Habitat for Humanity, building a bridge to this dream and necessity.

Without people working together, many families would not have a path to home ownership.

At Habitat Wake, we build homes, communities and hope!
